

## FIREPLACE DOOR LOCK #2135

### Tools Needed

Phillips screwdriver

### To Install

1. Use Phillips screwdriver to remove bolts from two bars.
2. Center long bar on top of fireplace door handles with holes on top and bottom.
3. Place bolts through each top hole so they pass through the top bar and door handles. Note: There are four holes to assure proper placement of bolts.
4. Center short bar under fireplace door handles with holes on top and bottom.
5. Line up holes in short bar so bolts pass through handles. Tighten bolts by hand, so that fireplace door handles are secured between bars.
6. Use Phillips screwdriver to tighten bolts.

Important: If bolts do not pass through door handles, this product is not installed correctly or should not be used.

Note: This product is designed to help minimize accidents. Use of this product is not a substitute for adult supervision.
