KidCo®
Auto Close HearthGate™
CUSTOM FIT INSTALLATION

Fits openings 132" • Optional 9" and 24" extensions available for larger areas
Barrière adaptée à des ouvertures de 335,2 cm • Rallonges de 22,8 et 60,9 cm
disponibles en option pour les grandes surfaces
Para aberturas de 132" • Hay disponibles extensiones opcionales de 9" y 24" para áreas más grandes

Parts list

- A** 24" Section (4)
- B** 30" Walk-Through Door Section
- C** Upper Post Wall Bracket
- D** Upper Receiver Wall Bracket
- E** Lower Post Wall Bracket
- F** Lower Receiver Wall Bracket
- G** Sliding Wall Bracket Assembly (2)
- H** Wall Plate (4-assembled to parts C, D, and G)
- I** Wood Screw (8) (1 3/8")
- J** Wall Mount Bar (2)

Assembly

1 To connect two sections, place hinge posts over the center of the next section's hinge receivers and press down until a click is heard. Continue adding more sections the same way. Optional 9" and 24" sections are available for purchase for larger areas or to construct a free standing enclosure.

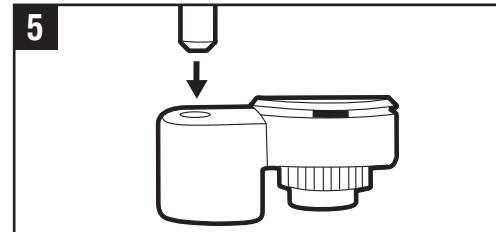

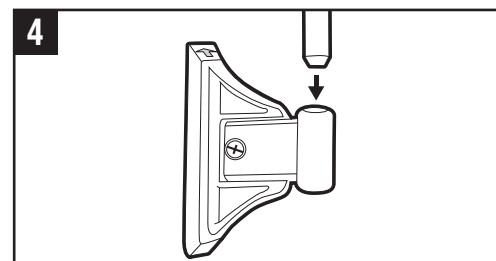

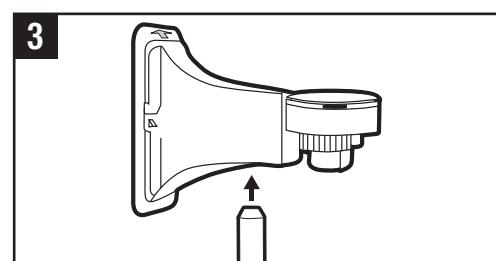

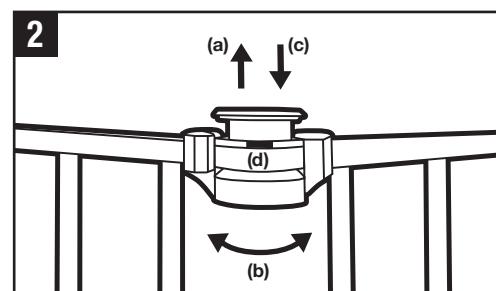

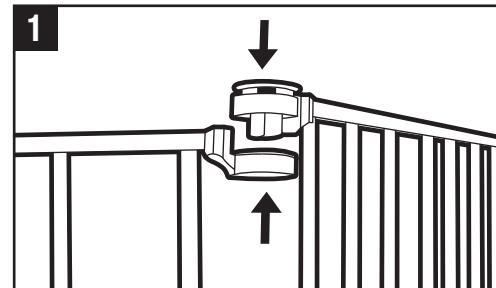

NOTE: The walk through door section can be positioned anywhere within the layout of the gate. For the auto close door feature to work properly the entire gate must be on a level surface, otherwise the door may have to be manually pushed shut.

2 Once all sections have been assembled lift all locking caps into the raised unlocked position (a) and adjust the angle of each section until desired configuration is achieved (b). Push down on all locking caps (c). If locking cap is difficult to lift, gently rotate sections to relieve pressure and/or carefully insert a coin or slotted screwdriver in notch (d) between cap and housing, and push up.

3 Insert wall mount bar into upper post bar bracket. The wall plate is already attached to the upper post bar bracket.

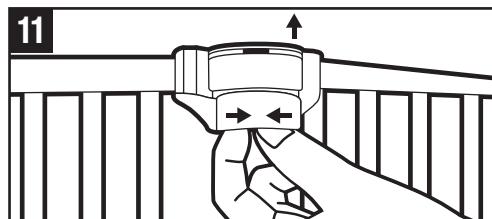

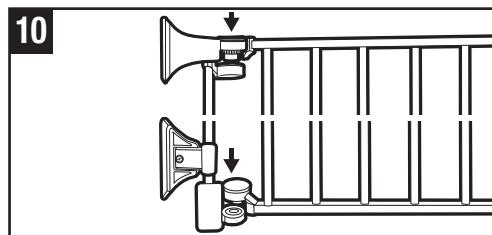

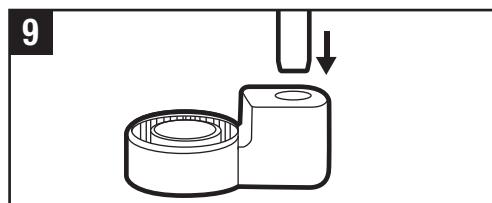

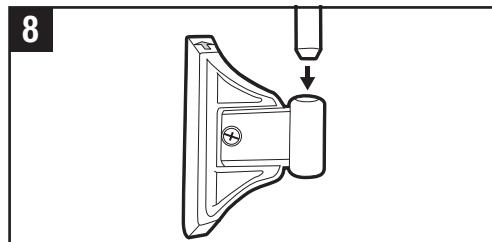

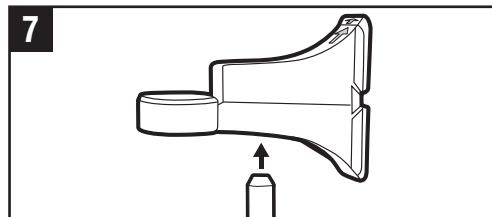

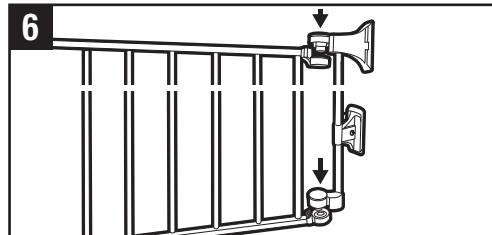

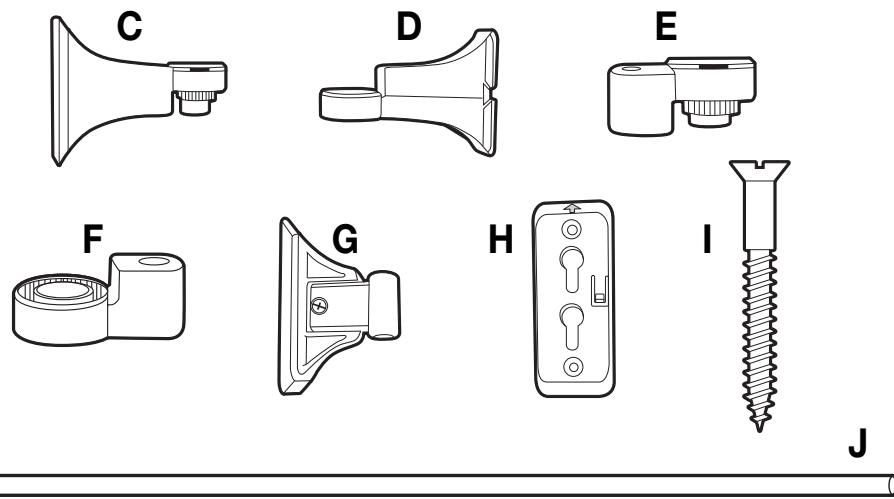

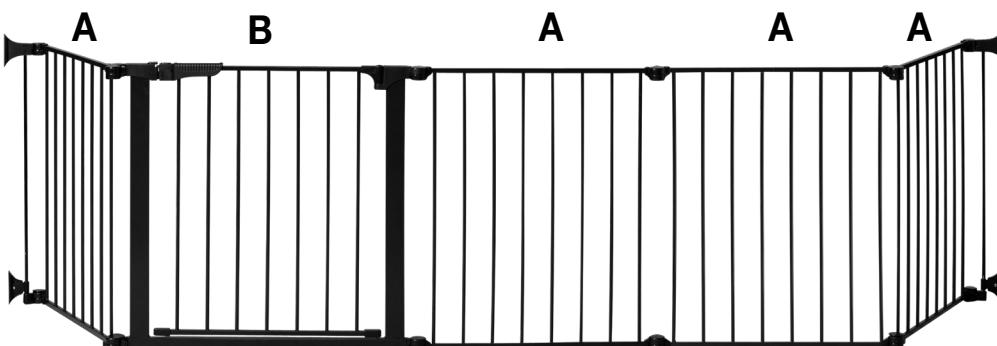

4 Insert bar into sliding wall bracket assembly with locking tabs lined up on right side and arrows facing up.

5 Insert bar into lower post bar housing.

Liste des pièces

- A** Section de 60,9 cm (4)
- B** Section portail de 76,2 cm
- C** Support mural de montant supérieur
- D** Support mural de récepteur supérieur
- E** Support mural de montant inférieur
- F** Support mural de récepteur inférieur
- G** Support mural coulissant (2)
- H** Plaque murale (4 montées sur les pièces C, D et G)
- I** Vis à bois (8)
- J** Barre de fixation murale (2)

6 Instale el conjunto de la barra en el extremo de la sección de la reja que tiene el receptor.

7 Inserte la barra de montaje en la pared en el soporte receptor superior de la barra. La placa de pared ya está instalada en el soporte receptor superior de la barra.

8 Inserte la barra en el conjunto del soporte deslizante de montaje en la pared con las cejas de cierre alineadas en el lado derecho y las flechas orientadas hacia arriba.

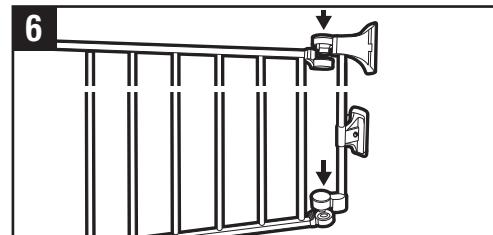

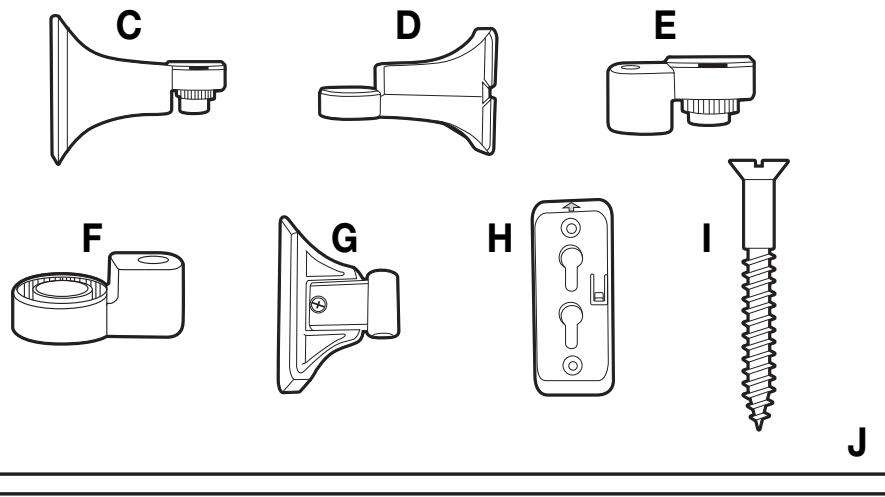

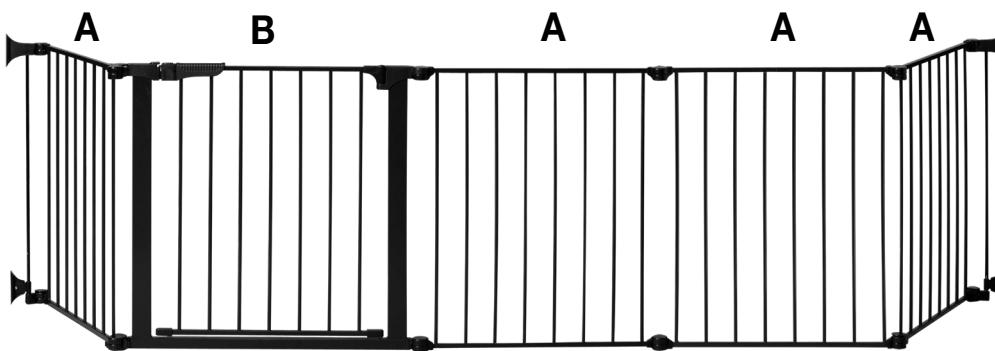

9 Inserte la barra en el orificio del receptor inferior de la barra.

10 Instale el conjunto de la barra en el extremo de la sección de la reja que tiene el poste.

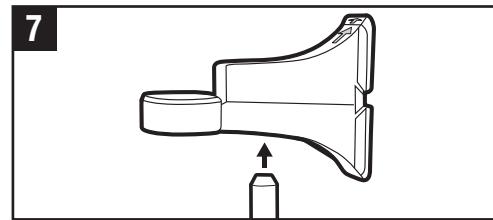

11 NOTA: Para quitar una sección. Coloque el pulgar y el dedo índice en las lengüetas acanaladas que se encuentran en el interior del perno de la bisagra superior y comprima a la vez que levanta.

Lista de piezas

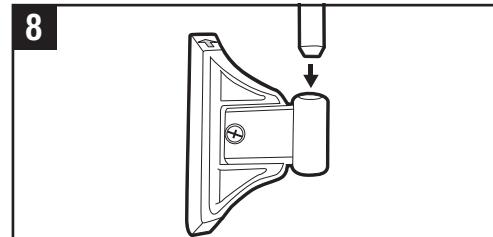

- A** Sección de 24" (4)
- B** Sección de la puerta de acceso, de 30"
- C** Soporte superior del poste de montaje en la pared
- D** Soporte receptor superior de montaje en la pared
- E** Soporte inferior del poste de montaje en la pared
- F** Soporte receptor inferior de montaje en la pared
- G** Conjunto de soportes deslizantes de montaje en la pared (2)
- H** Placa para la pared (4, montada en las piezas C, D y G)
- I** Tornillo para madera (8)
- J** Barra de montaje en la pared (2)

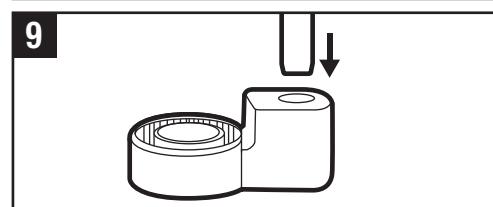

- 6** Attaquer la barre au récepteur de la section de barrière finale.

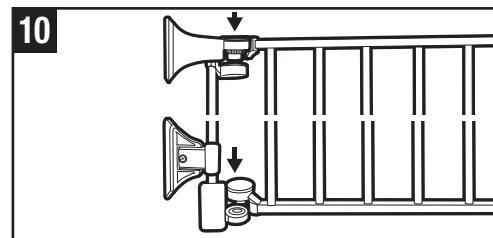

- 7** Insérer la barre de fixation murale dans le support de barre du récepteur supérieur. La plaque murale est déjà attachée au support de barre du récepteur supérieur.

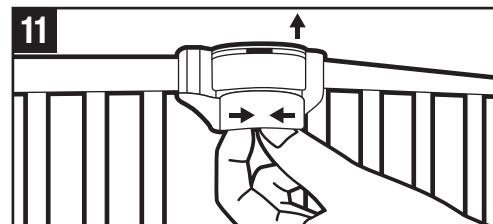

- 8** Insérer la barre dans le support mural coulissant en alignant les ergots de verrouillage sur le côté droit et les flèches pointant vers le haut.

- 9** Insérer la barre dans le boîtier de barre du récepteur inférieur.

- 10** Attacher la barre au montant de la section de barrière finale.

- 11** **REMARQUE :** Pour enlever une section. Placer le pouce et l'index sur les onglets crantés à l'intérieur du montant de charnière supérieure et pincer tout en soulevant.

Important Information

FOLLOW THESE INSTRUCTIONS CAREFULLY AND KEEP THEM FOR FUTURE REFERENCE

This gate is designed for children from 6 months to 24 months. Since each child's skills develop at different ages, these age parameters should be monitored against your child's own development.

When installed as instructed, between two clean structurally sound surfaces, this gate conforms to applicable ASTM standards.

⚠ WARNING

- Intended for use with children from 6 months through 24 months
- Check the stability of the gate and tighten all hardware and mountings regularly
- To prevent serious injury or death, securely install gate or enclosure and use according to manufacturer's instructions
- Never use with a child able to climb over or dislodge/open the gate or enclosure
- Never use if gate is less than $\frac{3}{4}$ of child's height
- Do not use if any part of the gate is broken or missing
- This product will not necessarily prevent all accidents. Never leave child unattended
- Use only spare parts available from KidCo®
- Never allow child to climb or swing on gate
- Use only with the locking/latching mechanism securely engaged
- Never use gate at top of stairs
- Discontinue use if any part of the gate is damaged
- Never climb over the gate
- Never hang or tie toys, etc, to any part of the gate

Maintenance

No part of the gate requires lubrication. Clean using warm, soapy water or a damp cloth. Do not use abrasive cleaners or bleach. Once installed the gate should be checked periodically to ensure a safe and secure fit and to maintain proper working order.
