

# SLIDING SAFETY PLATE

## Tools Needed

Screwdriver

## To Install

1. Disconnect power to the outlet by turning the circuit breaker off or removing the fuse at the electrical panel.
2. Remove existing outlet cover and replace with Sliding Safety Plate using the supplied screws. Make sure not to over tighten the screws as this may cause the outlet cover not to slide freely.
3. It may be necessary to adjust the receptacles for proper fit.

Note: This product is designed to help minimize accidents. Use of this product is not a substitute for adult supervision.
